Professional Summary

I am a Software Engineer with a background in physics, driven by a passion for problem solving and optimizing systems. I am highly skilled in full-stack development, including technologies like React, Node.js, PostgreSQL, and Express. I focus on delivering efficient, scalable solutions with a user-centred approach. My adaptability, strategic thinking, and continuous curiosity fuel my desire for constant improvement. Whether working independently or in teams, I prioritize precision, innovation, and delivering impactful solutions that go beyond functionality to create meaningful, seamless user experiences.

Development Projects

Prepare for Battle – [GitHub](#) | [Demo](#)

- A Warhammer 40K single-page web app designed to streamline game preparation by simplifying army management and rule navigation.
- Developed as my capstone project at General Assembly, I built the MVP independently in one week and refined it over two additional weeks.
- Features a user-friendly interface for rule gathering, army customization, and custom PDF generation for easy reference.
- I actively maintain and update the project to ensure compatibility with new rule releases.
- **Technology Stack:** React, JavaScript, Node.js, Express, PostgreSQL, PDF-Library

Deep Notes – [GitHub](#) | [Demo](#)

- An AI-powered audio transcription and summarization tool designed to capture and condense spoken content from platforms like Zoom and YouTube.
- Developed as part of a **team project**, with a focus on aiding students in lectures and professionals in meetings.
- Utilizes DeepGram for real-time transcription from system, local and remote audio.
- Leverages the OpenAI API to generate concise summaries, extracting key insights from transcripts.
- **Technology Stack:** Electron, React, PostgreSQL, TypeScript, Deep-Gram, OpenAI, Node.js

Soft Skills

- **Communication:** Proven ability to explain complex concepts in teaching, teamwork, and coaching contexts.
- **Ability to work in a team:** Experience working collaboratively in cross-functional teams to deliver successful outcomes in software development projects.
- **Problem Solving:** Expertise in tackling complex challenges in tutoring, engineering, and sports training.

Technical Skills

- **Development Practices & Tools:** Git, GitHub, API Integration, Jest, Expo, Vite, Agile, Test-Driven Development (TDD), RESTful APIs, SendGrid, cron.
- **Programming languages & frameworks:** HTML, CSS, Node.js, React (JavaScript, TypeScript), Express.js, PostgreSQL, PDF-Library.
- **Modern cloud technologies** AWS, Google Cloud, Azure.

Education

General Assembly, Sydney

Software Engineering Bootcamp Certificate (Completed: July 2024)

Royal Melbourne Institute of Technology, Melbourne

Bachelor of Applied Science in Physics (Completed: November 2022)

Work Experience

Commercial Software development

Chiro Oceania Hub September – November 2024 – [GitHub](#) | [Demo](#)

- Led a development team to build a seminar management system for Mt Eliza Family Chiropractic Clinic, managing client communications and stakeholder relationships to ensure all requirements were met.
- Designed a secure backend (Node.js, PostgreSQL) and a responsive frontend (React.js) to ensure a seamless user experience.
- Integrated Google Pay for payments and Full-Calendar for scheduling to enhance operational efficiency.
- Designed an automated email system using cron and SendGrid to keep users updated on events.
- Maintained strong client relationships through regular updates and feedback, aligning development with business needs in an Agile SDLC.
- **Technology Stack:** React.js, Node.js, Express, PostgreSQL, Google Pay, Full-Calendar, SendGrid, cron.

Full-stack Engineer training

General Assembly, May – July 2024

- Developed high-end, responsive web applications using full-stack technologies.
- Collaborated with cross-functional teams to tackle complex problems, create scalable APIs, and optimize performance.
- Participated in Agile workflows, including daily stand-ups and sprint planning, adapting to evolving project requirements.
- Utilized Git for version control, ensuring smooth collaboration and proper documentation.

Math & Physics Tutor

Ezy-Math Tutoring, Melbourne, 2021 – 2022

- Created personalized learning plans to meet individual student needs and regularly assessed progress to adjust lessons.
- Simplified complex concepts, fostering a growth mindset and building student confidence.
- Provided additional resources and a supportive learning environment to keep students motivated and engaged.
